Logistics

Logistics

Diverse | Flexible | Unique

Our customers and their requirements are as diverse as our range of services. Our logistics adapt to the specific needs of your business and remain flexible for future changes.

Contract Logistics

ITC is your one-stop contract logistics provider for all tasks along the supply chain.

In dialogue with you, we plan the tailored implementation of your specific requirements, including all conceivable services along the value chain. We maintain open communication, ensuring adjustments and optimizations suit your new projects.

Ideal Central Warehouse Logistics with ITC

Discover with ITC the perfect locations for efficient central warehouse logistics that meet your requirements for Europe-wide distribution and global procurement. Our strategically located warehouses enable smooth transportation of your goods by land, air, and sea, including professional customs clearance services.

With daily departures from our central warehouses, we can reach your international customers in the shortest possible time with the highest reliability. On the back of this brochure, you will find an overview of all German locations, providing a comprehensive insight into our network. Count on ITC for central warehouse logistics that are efficient, flexible, and customer-oriented.

SUPERCALIFREIGHTLOGISTICS- EXPORTALITOCIOUS?

Complicated Processes Made Simple!

simply.professional.itc

Spare Parts Logistics / Webshop

Use online logistics as a key success factor for your business. We connect your web store to our merchandise management system and the connected transport systems. You will benefit from the fastest order processing available, including a CEP data-interface (courier and parcel).

- Orders from the web store are sent to our ERP system and can be transferred directly to you via interfaces. The orders are then picked, packed, and handed over for shipping.
- You have access to all relevant information at all times through our data hub, which we can also automatically send to you or your customers via email.

Cutting-edge Data Technology

Our data hub allows us to quickly establish connections between the various systems involved in the logistics process, ensuring 100% transparency for you, anytime and anywhere.

Examples include:

- Orders & Invoices
- Inventories
- Shipment interfaces
- Deviations in the control process
- Various reports & shipment details

All available and relevant information can be made available for data exchange. We are also happy to generate automatic reports in your desired format (e-mail, Excel, etc.) and send them out regularly at a time of your choosing.

Logistics Consulting

Benefit from the expertise of our consultants and the know-how of a transport and logistics service provider with nearly five decades of experience.

Logistics know-how from analysis to execution

ITC Logistic Solutions develops cost- and performance-optimized logistics solutions together with you, from practice for practice.

- Improve delivery service and increase flexibility
- Optimize inventories
- Reduce vertical manufacturing range, capital commitment, variabilize fixed costs and logistics costs
- Provide external know-how

We are looking forward to hearing from you!
