- Project handling
- Preparation of L/C-compliant transport documentation
- Provision of order-related truck freight space
- Neutralization of documents
- Transport monitoring, delivery date tracking
- Load securing
- Transport insurance
- Customs service

## Short-Sea-Service

### The true alternative to road transport

Short sea shipping offers a viable alternative to road transport, allowing you to book 45' and 45' high cube containers that match the internal dimensions of a classic truck. This ensures no transit time delays and full utilization of a truck's loading volume, especially for routes like Ireland.

### The shipping container becomes a truck

In addition to the classic standard containers, pallet-width 45' containers are also used in short sea transport. This means that the internal dimensions match those of a classic truck and therefore offer a viable alternative for road transport.

## Customs Service

- Professional consulting
- Electronic export declaration (AES)
- Digital customs clearance via ATLAS (DE)
- Excise tax declaration
- Document neutralization
- Applications for remission or refund
- Customs clearance including T1 documents
- Translation services for customs documents
- EU customs clearance and fiscal representation

# ITC Web Portal

Start optimizing your logistics operations by using our free web portal for shipment management.
